Measure the student with the measuring tape being held loosely and with the student standing with feet about hip distance apart and with tall, good posture. Do not have them suck their tummy in.

_____ (bust or chest)

_____ (waist)

_____ (hips)

_____ (girth)

(For the girth, measure from the center of the right shoulder, through the crotch, and back up to the shoulder. Hold the measuring tape loosely.)

Compare the measurements taken to the chart above and select the size you want me to order.

Please note: For determining sizes for all costumes:

- Usually the girth measurement is the most important, however, many who are very slender and also very long in the body will need to go to the next size.
- Bust development usually requires an adult size.
- If the child is heavy framed (hips, tummy, or bust/chest), go to the next size.
- If the student traditionally wears a larger size than the measurements indicate, go to the next size.
- Please remember, our recital is 6 months away so do *allow for growth*.
